Subject Index to Volume 17

- Al_2O_3 films growth on β -NiAl, 223
 Al_2O_3 scales, ^{18}O tracer studies, 429
 Al_2O_3 scales, protective nature during sulfidation of Fe-Cr-Al alloys, 315
Aluminide coatings, on IN-100, 27
Aluminide coatings, on steel, 391
- β -NiAl, oxidation of, 223
- Chromia layers, thickness determination by X-Rays, 345
Chromoaluminide coatings, on IN-100, 27
Chromium diffusion in Cr_2O_3 , 177
Chromium oxide, reflectance spectroscopy of, 157
Chromium, re-oxidation of, 127
Chromium transport through Cr_2O_3 scales, 177, 195
 Cl_2 - O_2 mixtures, products formed from, 371
Coal-Gasifier Environments, Sulfidation-Oxidation, 1
Coatings, on IN-100, 27
Coatings, Titanium silicide on Ti, 43
Cobalt alloys, corrosion in C- O_2 atmospheres, 235
Cobalt-chromium alloys, oxidation mechanism, 267
Cobalt, morphology of scales formed in O_2 - Cl_2 , 371
Cobalt, oxidation kinetics and mechanism, 55
- Diffusion in ferrous sulphide, 77
Duplex scale formation on 18-8 stainless, 329
- Ferrous sulphide, diffusion in, 77
- High velocity oxidation, 205
Hot corrosion of NiCrAl alloys, 205
- IN-100, coatings on, 27
Internal oxidation, depth of, EDAX analyses, 407
Internal oxidation, effect of supersaturation on, 99
Iron alloys, corrosion in C- O_2 atmospheres, 235
Iron-Chromium alloys, sulfidation in H_2S - H_2 , 299
Iron-Chromium-aluminum alloys, sulfidation, 315
Iron, sulfidation of, 77
- Mechanism of oxidation, Cobalt, 55
Mechanism of oxidation, Co-Cr alloys, 267
- Nickel alloys, corrosion in C- O_2 atmospheres, 235
Nickel-aluminum alloys, internal oxidation, 407
Nickel-chromium-aluminum alloys, ^{18}O tracer studies in Al_2O_3 scales, 429
Nickel, morphology of scales formed in O_2 - Cl_2 , 371
- ^{18}O tracer studies in Al_2O_3 scales, 429
- Pack-aluminide coatings on steel, 391
- Reflectance spectroscopy of oxide films, 141, 157
- Spinel, in stainless steel oxides, thickness measurement, 345
Stainless steel, 18-8, duplex scale formation, 329
Stainless steel, thickness measurement of scale thickness by X-Rays, 345

Stainless steel, Ti-modified, oxidation of, 415
Sulfidation of Fe-Cr-Al alloys, 315
Sulfidation of Fe-Cr alloys in H_2S-H_2 , 299
Sulfidation of iron, 77
Sulfidation-Oxidation in Low BTU Coal-Gasifier Environments, 1
Supersaturation, effect of on internal oxidation, 99
Thickness measurement of scales by X-Rays, 345
Ti-1Si, oxidation of, 359

Ti-5Si, oxidation of, 359
Titanium silicide coatings, on Ti, 43
Vacuum annealing, effect on Cr_2O_3 scale morphology, 195
X-Ray diffractometry, use of to measure scale thickness, 345
X-Ray energy dispersive analyses, use of to determine internal oxidation depth, 407
X-Ray topographic studies of Al_2O_3 films, 223

Instructions to Contributors

1. Manuscripts should be sent to:
Prof. D. L. Douglass
Materials Department
Room 6531, Boelter Hall
University of California at Los Angeles
Los Angeles, California 90024
2. Submission is a representation that the manuscript has not been published previously and is not currently under consideration for publication elsewhere. A statement transferring copyright from the authors (or their employers, if they hold the copyright) to Plenum Publishing Corporation will be required before the manuscript can be accepted for publication. The Editor will supply the necessary forms for this transfer. Such a written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the new U.S. Copyright Law in order for the publisher to carry through the dissemination of research results and reviews as widely and effectively as possible.
3. Type double-spaced, and submit the original and two copies (including, where possible, copies of all illustrations and tables).
4. An abstract of 150 words or less is to be provided.
5. A list of 4–5 key words is to be provided directly below the abstract. Key words should express the precise content of the manuscript, as they are used for indexing purposes, both internal and external.
6. Illustrations (photographs, drawings, diagrams, and charts) are to be numbered in one consecutive series of Arabic numerals. The captions for illustrations should be typed on a separate sheet of paper. Photographs should be large, glossy prints, showing high contrast. Drawings should be prepared with india ink. Either the original drawings or good-quality photographic prints are acceptable. Identify figures on the back with author's name and number of the illustration.
7. Tables should be numbered and referred to by number in the text. Each table should be typed on a separate sheet of paper.
8. References should be made by using superscript Arabic numerals, and the full references should be given in a list at the end of the paper. For maximum clarity, abbreviations should be avoided in the references. Whenever a book is cited, the number of the relevant chapter should be given.
9. In general, *Oxidation of Metals* follows the recommendations of the American Institute of Physics in their *Style Manual*, and it is suggested that contributors refer to this publication.
10. **The journal makes no page charges.** Reprints are available to authors, and order forms are sent with proofs.

CONTENTS

Sulfidation Properties of Fe-Cr Alloys at 1073 K in H ₂ S-H ₂ Atmospheres of Sulfur Pressures 10 ⁻² and 10 ⁻⁵ Pa <i>T. Narita, W. W. Smeltzer, and K. Nishida</i>	299
Protection of Fe-Cr-Al Alloys in Sulfidizing Environments by Means of an α -Al ₂ O ₃ Scale <i>P. A. Mari, J. M. Chaix, and J. P. Larpin</i>	315
The Kinetics of Duplex Scale Formation on 18/8 Type Stainless Steel <i>A. F. Smith, M. O. Tucker, and R. Hales</i>	329
Thickness Measurements of Spinel and Chromia Layers in Stainless Steel Oxide Scales by X-Ray Diffractometry <i>P. A. Tempest and R. K. Wild</i>	345
Oxidation of Ti-1Si and Ti-5Si Alloys <i>Casimir J. Rosa</i>	359
Morphology of Corrosion Products Formed on Cobalt and Nickel in Argon-Oxygen-Chlorine Mixtures at 1000 K <i>M. J. McNallan, W. W. Liang, J. M. Oh, and C. T. Kang</i>	371
An Investigation of Pack-Aluminide Coating on Steel <i>R. Sivakumar and E. Janardhana Rao</i>	391
Application of X-Ray Energy Dispersive Analyses (EDAX) to Determine the Penetration Depth of One Oxide Phase (NiAl ₂ O ₄) in a Two-Phase Oxide Internal Oxidation Zone (NiAl ₂ O ₄ + Al ₂ O ₃) of a Binary Alloy (Ni-Al) <i>F. A. Elrefaie and W. W. Smeltzer</i>	407
Oxidation of Titanium Modified Type 310 Stainless Steel in Low Oxygen Partial Pressure Atmospheres <i>A. S. Nagelberg</i>	415
¹⁸ O Tracer Studies of Al ₂ O ₃ Scale Formation on NiCrAl Alloys <i>K. P. R. Reddy, J. L. Smialek, and A. R. Cooper</i>	429
